

## Card.java

```
1 package game.cards;
2
3 public abstract class Card
4 {
5     private String cardDescription;
6
7     public Card(String cardDescription){
8
9         this.cardDescription = cardDescription;
10    }
11
12    public String setCardDescription(){
13
14        return cardDescription;
15    }
16    //TODO: Implement me!!! Probably with inheritance
17
18    public String getCardDescription() {
19        // TODO Auto-generated method stub
20        return cardDescription;
21    }
22
23
24 }
25
```
